

Asset Management System

Detailed Guided UI Demonstration

24 verified workflows with explanations and captured application screens.

Generated from the isolated Playwright demonstration. Temporary data is used so the ordinary application database is not affected.

01. Administrator dashboard and activity summary

- Sign in with the temporary administrator account.
- Review asset totals, current status counters, recent activity and recent gate passes.
- Confirm that the administrator navigation exposes all application modules.

On-screen actions

1. Enter the credentials for pw_demo_admin.
2. Sign in and open the dashboard.

Asset Management

No gate passes.

02. Asset register search and status filtering

- Open Assets from the main navigation.
- Search by make and apply the Issued status filter.
- Confirm that the baseline demonstration asset remains visible.

On-screen actions

1. Open the Assets module.
2. Search the asset register by make and filter it to Issued assets.

03. Authenticated QR webpage and QR image endpoint

- Open the baseline asset record and verify its QR image endpoint.
- Open the authenticated QR landing page.
- Confirm the QR page resolves to the correct asset.

On-screen actions

1. Open the baseline asset record.
2. Open the asset page represented by the QR code.

04. Asset edit and audit-producing update

- Open the asset edit form and change its remarks.
- Save the record and verify the success message.
- The update is written to the application's audit activity.

On-screen actions

1. Open the asset edit form.
2. Update the remarks so the change appears in the audit trail.
3. Save the asset update.

15. Excel upload, validation preview and confirmed bulk import

- Upload the generated two-row asset workbook.
- Review the validation result before changing application data.
- Confirm the batch and verify both valid rows are imported.

On-screen actions

1. Open the Import module.
2. Open the bulk-import upload form.
3. Attach the generated Excel workbook and add a batch note.
4. Upload the workbook and validate every row.
5. Confirm the validated batch and create the assets.

17. Physical verification of assets

- Open Verification and choose Record verification.
- List the assets expected at the demo office and mark each Available or Not available.
- Review the verification report with date-range and result filters.

On-screen actions

1. Open the Verification module.
2. Start a physical verification.
3. Choose the demo office and list the assets expected there.
4. List the assets expected at this location.
5. Mark every listed asset as available.
6. Save the verification results.

PWDEMO - Playwright Demo Division

02-10-2026

PWDEMO overdue reporting scenario

19. Date-wise PIR/DIR report grouped by division

- Open Asset reports and choose a date range, the PIR/DIR type and a Division-wise report.
- Reports are also available employee-wise, room-wise, location-wise, building-wise and centre-wise.
- The same filters apply to the CSV download.

On-screen actions

1. Open the configurable asset reports.
2. Choose a Division-wise PIR report for this month's registrations.
3. Generate the report.

20. Administration master data: divisions, locations, employees and suppliers

- Open Django Administration with the administrator account.
- Review the prepared division, locations, employees and supplier.
- Confirm that operational forms are backed by maintained master data.

On-screen actions

1. Open the Administration module.
2. Review the prepared master data used by operational workflows.

The screenshot displays the Django administration interface. The top navigation bar includes the title "Django administration" and a breadcrumb trail "Home > Core > Suppliers". A dark blue banner at the top right indicates the current checkpoint: "Checkpoint 20: Administration master data: divisions, locations, employees and suppliers".

On the left side, there is a sidebar menu with a search bar "Start typing to filter...". The menu is organized into sections: "ASSETS" (Asset verifications, Assets), "AUTHENTICATION AND AUTHORIZATION" (Groups, Users), "CORE" (Attachments, Audit events, Budget classifications, Budget master, Buildings, Centres, Current places / locations, Divisions, Employees, Locations, Project codes, Rooms, Sections, Sub sections, Suppliers), "DISPOSAL" (Disposal records), and "GATEPASSER". The "Suppliers" item under the "CORE" section is highlighted in yellow.

The main content area is titled "Select supplier to change" and features an "ADD SUPPLIER +" button. Below the title, there is an "Action:" dropdown menu and a "Go" button, with a status "0 of 1 selected". A list of suppliers is shown, with checkboxes for "SUPPLIER" and "PW Demo Supplier". At the bottom of the list, it states "1 supplier".

21. Employee master with year-wise calendar

- Open Add employee in Administration.
- Date of joining and date of retirement are recorded for each employee.
- The calendar sits beside the date and offers month and year drop-downs for quick year-wise navigation.

On-screen actions

1. Open the calendar beside Date of joining.

The screenshot displays the Django administration interface for adding a new employee. The left sidebar contains a navigation menu with categories: ASSETS, AUTHENTICATION AND AUTHORIZATION, CORE, and DISPOSAL. The 'Employees' link under the CORE category is highlighted. The main content area is titled 'Add employee' and contains several form fields: Employee id, Name, Division, Section, Email, Date of joining, Date of retirement, and User. The 'Date of joining' field is selected, and a calendar widget is displayed. The calendar shows the month of October 2016, with the 1st of the month highlighted. The calendar also includes navigation controls for previous/next month and year, and a 'Today' button. The 'Is active' checkbox is checked. The bottom of the form has 'SAVE' and 'Save and add another' buttons. The top right of the interface shows the Django administration logo and a breadcrumb trail: Home > Core > Employees > Add employee. A checkpoint label 'Checkpoint 21: Employee master with year-wise calendar' is visible in the top right corner.

22. Administration user and role assignment

- Search for the temporary report-viewer user.
- Open the user and verify membership in the Report Viewer group.
- This demonstrates role-based permission assignment.

On-screen actions

1. Search for the prepared report-viewer user.
2. Open the user and inspect the assigned role.

Start typing to filter...
