

Asset Management System

Detailed Guided UI Demonstration

18 verified workflows with explanations and captured application screens.

Generated from the isolated Playwright demonstration. Temporary data is used so the ordinary application database is not affected.

01. Administrator dashboard and activity summary

- Sign in with the temporary administrator account.
- Review asset totals, current status counters, recent activity and recent gate passes.
- Confirm that the administrator navigation exposes all application modules.

On-screen actions

1. Enter the credentials for pw_demo_admin.
2. Sign in and open the dashboard.

Asset Management

No gate passes.

02. Asset register search and status filtering

- Open Assets from the main navigation.
- Search by make and apply the Assigned status filter.
- Confirm that the baseline demonstration asset remains visible.

On-screen actions

1. Open the Assets module.
2. Search the asset register by make and filter it to Assigned assets.

Asset Management

03. Authenticated QR webpage and QR image endpoint

- Open the baseline asset record and verify its QR image endpoint.
- Open the authenticated QR landing page.
- Confirm the QR page resolves to the correct asset.

On-screen actions

1. Open the baseline asset record.
2. Open the asset page represented by the QR code.

04. Asset edit and audit-producing update

- Open the asset edit form and change its remarks.
- Save the record and verify the success message.
- The update is written to the application's audit activity.

On-screen actions

1. Open the asset edit form.
2. Update the remarks so the change appears in the audit trail.
3. Save the asset update.

08. Temporary gate pass: request, Stores approval, outward and inward

- Create a temporary gate pass for the UI-created asset.
- Demonstrate the controlled sequence: request, Stores approval and security outward.
- Mark the asset inward and confirm the pass closes and the asset returns to stock.

On-screen actions

1. Open the Gate Passes module.
2. Start a new gate-pass request.
3. Enter the temporary gate-pass details and expected destination.
4. Select asset PWDEMO-UI-001 for this gate pass.
5. Submit the gate pass for Stores approval.
6. Approve the requested gate pass as Stores.
7. Record the security outward movement.
8. Record the asset's inward return and close the temporary pass.
9. Open the asset and verify it returned to stock.

08. Temporary gate pass: request, Stores approval, outward and inward - Screen capture

Verified application state after completing the actions described on the preceding page.

09. Overdue temporary gate pass left outward for reporting

- Create a temporary gate pass with an expected return date in the past.
- Approve it and mark it outward.
- Leave it open so the Reports screen can identify it as overdue.

On-screen actions

1. Open the Gate Passes module.
2. Start a new gate-pass request.
3. Enter the temporary gate-pass details and expected destination.
4. Select asset PWDEMO-OVERDUE-001 for this gate pass.
5. Submit the gate pass for Stores approval.
6. Approve the requested gate pass as Stores.
7. Record the security outward movement.

GP-202607-71CF3F98	PWDEMO - Playwright Demo Division	July 22, 2026	PWDEMO overdue reporting scenario

15. Administration master data: divisions, locations, employees and suppliers

- Open Django Administration with the administrator account.
- Review the prepared division, locations, employees and supplier.
- Confirm that operational forms are backed by maintained master data.

On-screen actions

1. Open the Administration module.
2. Review the prepared master data used by operational workflows.

The screenshot displays the Django administration interface. The top navigation bar includes the title 'Django administration' and a breadcrumb trail 'Home > Core > Suppliers'. A dark blue banner at the top right contains the text 'Checkpoint 15: Administration master data: divisions, locations, employees and suppliers'. On the left, a sidebar menu lists various modules: ASSETS, AUTHENTICATION AND AUTHORIZATION, CORE, DISPOSAL, GATEPASSES, IMPORTS, and MOVEMENTS. The 'Suppliers' module is highlighted in yellow. The main content area is titled 'Select supplier to change' and features an 'ADD SUPPLIER +' button. Below this, there is a search bar with the text 'Start typing to filter...', an 'Action:' dropdown menu, and a 'Go' button. A list of suppliers is shown, with one entry 'PW Demo Supplier' and a count of '1 supplier'.

16. Administration user and role assignment

- Search for the temporary report-viewer user.
- Open the user and verify membership in the Report Viewer group.
- This demonstrates role-based permission assignment.

On-screen actions

1. Search for the prepared report-viewer user.
2. Open the user and inspect the assigned role.

Start typing to filter...
